                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       88

Sequence 8234, Application US/09949016

Patent No. 6812339

GENERAL INFORMATION:
APPLICANT: VENTER, J. Craig et al.
TITLE OF INVENTION: POLYMORPHISMS IN KNOWN GENES ASSOCIATED
TITLE OF INVENTION: WITH HUMAN DISEASE, METHODS OF DETECTION AND
FILE REFERENCE: CLOOL307

CURRENT APPLICATION NUMBER: US/09/949,016

CCURRENT FILING DATE: 2000-04-14
PRIOR APPLICATION NUMBER: 60/241,755
PRIOR APPLICATION NUMBER: 60/247,768

PCT-US00-14696-11

Sequence 11, Application PC/TUS0014696

GENERAL INFORMATION:

APPLICANT: Bird, Timothy A.
APPLICANT: Wirca, George Duke
APPLICANT: Wirca, George Duke
APPLICANT: Martin, Unja
APPLICANT: Anderson, Dirk M.
TITLE OF INVENTION: NOVEL MURINE AND HUMAN KINASES
FILE REFERENCE: 2923-WO
CCURRENT APPLICATION UNUMBER: PCT/US00/14696

CCURRENT FILING DATE: 2000-05-26

NUMBER OF SEQ ID NOS: 16
SOSTWARE: Patentin Ver. 2.1
SEQ ID NO 11
LENGTH: 631
TYPE: PRT
ORGANISM: Mus musculus
